-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu et al in view of Cn 88-1-02377 A.

Shimizu et al teach the claimed subject matter except for showing the specific lever structure. In this respect the patent to CN is applied for teaching use of a microwave door having push bar 230 , latches 44,23. Note use of means 34 which comprise a lever

with three arms, as claimed. In view of this teaching it would have been obvious to modify the Shimizu et al patent to include push bar 28,,60 to effect lever movement with three arms, such modification using less parts than multiple lever means with the advantage of cost savings.

As per claims 3 and 4 note latch means 44 and 46 in Shimizu et al. As per claim 7-note door opening for means 20 in Cn. AS per claim 6 it is conventional to form the door as one panel, as part of the entire door. As per the dependent claims setting forth pins and connections and springs for the latch panel, the artisan would find it well within the level of ordinary skill in door systems to fasten the door and lock components in a safe and durable fashion.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohkado is cited for disclosing a microwave door structure having push bar 42 to effect lever controls.
